RE: New York State Capitol  
Consigli Project #845  
Hydro-Mobile Scaffolding

Dear Larry,

I have been very impressed with the way Great Lakes Scaffolding has helped Consigli Construction with the Hydro-Mobil Scaffolding on the New York State Capitol project in Albany, New York. With all the security, access, and safety particularities on this project, we were pleased with the way you identified our needs, proposed a choice of solutions, and came up with a plan showing us the access details we needed.

Your pre-planning also saved us many hardships. The vehicle and pedestrian traffic was dealt with by delivering the equipment onto our site on weekends. Other obstacles that we encountered, such as the existing stone railings, granite benches and the shoring needed to support the bases around these existing structures on the Promenade Deck was handled quickly and efficiently. All this did not happen by chance, since you made many trips to our site to deal with these issues. We were also backed up by Bruce from Hydro-Mobile Scaffolding, handling all the Safety Training requirements we needed.

Overall, the services provided by Great Lakes Scaffolding and Hydro Mobile are excellent considering the complete package we needed, which includes the equipment selection, detailed drawings, installation execution, multi-trade personnel training and local support to keep the project going.

Working with Great Lakes Scaffolding and Hydro-Mobile Scaffolding has been a pleasure, and we look forward to using your expertise on many more jobs that we may have in the future.

Professionally,

Michael Walters – Project Manager
