To: Great Lakes Scaffolding co.  
From: Tony Marra  
Subject: Testimonial

Dear Mr. McConnellee,

Stebbins made the decision to purchase Hydro Mobile mast climbers based on the need for job site safety, demanding schedules and the knowledge that we could configure platform layouts to whatever our engineers and customers needed. Our crews now spend time focusing on their work instead of worrying about making the next lift. Working at a comfortable height reduces fatigue and has improved our productivity enormously.

Thank you Great Lakes Scaffolding for your innovation, training and first class support of our Hydro Mobile products. We look forward to continued success.

Sincerely,

Tony Marra  
Vice President of Construction
